

Encounter Collaborative

Single source solution provider for all your conferencing needs

Dynamic meetings with remote employees. Sales-winning demos. Company-wide training that's on-demand and instantly accessible. Live Meeting is real-time interactive web conferencing software that let's you meet and collaborate online in a productive, media-rich environment. As part of the Microsoft Office suite, Live Meeting integrates smoothly and seamlessly with your existing systems. So, you can schedule a meeting from Outlook, drag-and-drop documents from Excel and Word or go on a web tour using your browser. It works with non-Microsoft products, too. That's the real power of Live Meeting. You can broadcast visuals of any type to remote participants in real-time.

- :: **24/7 Customer Care**

Meet and Collaborate Online with Live Meeting

Getting Started is Easy

Live Meeting is a hosted service that requires a quick, one-time download for presenters and attendees. It takes just minutes to get up and running, so you can start hosting meetings right away. To start a meeting, you simply log into your Live Meeting account, upload your presentation materials and go. It's that easy. With Encounter's Live Meeting web conferencing software you can:

- :: Collaborate or make revisions to any document in real-time
- :: Share control of any software running on your desktop with your attendees
- :: Illustrate an idea or draw a picture with an electronic whiteboard
- :: Receive instant feedback with real time polling of attendees
- :: Take your attendees to any live web page and host a tour

- :: Add surveys or other forms to gather information about attendees
- :: Chat live with an attendee during your web conference
- :: Customize the meeting environment based on the number of participants and desired level of interactivity
- :: Save or print your meeting content
- :: Record your meeting for playback and archiving
- :: Include Encounter's Broadcast, Express or Priority Audio with your web meetings
- :: Take advantage of Encounter's fully integrated Audio Control Panel, which allows Live Meeting users the ability to call meeting attendees (or instruct attendees to dial in) directly from within the Live Meeting console
